

ABHIJEET MASKE

Aspiring DevOps Engineer | Linux | Docker | Kubernetes | Jenkins | CI/CD | AWS

Pune, Maharashtra, India | 9130811810 | abhijeetmaske609@gmail.com | [LinkedIn](#) | [GitHub: abhihkX8](#)

SUMMARY

Motivated and self-driven aspiring DevOps Engineer with hands-on project experience in building and automating CI/CD pipelines, containerizing applications, and deploying workloads on Kubernetes. Skilled in Linux, Git/GitHub, Docker, Jenkins, and GitLab CI/CD, with growing expertise in AWS, Terraform, and Ansible. Combines a strong technical foundation with real-world client-facing and stakeholder communication experience gained in business development, bringing a practical, results-oriented approach to automation and infrastructure projects.

TECHNICAL SKILLS

- DevOps & CI/CD: Jenkins, GitLab CI/CD, GitHub Actions (webhooks), Docker, Kubernetes
- Infrastructure as Code & Automation: Terraform, Ansible (learning)
- Cloud Platforms: AWS (pursuing Solutions Architect Associate – SAA-C03), Azure (exploring), GCP (exploring)
- Systems & Scripting: Linux, Shell Scripting
- Version Control: Git, GitHub, GitLab
- Monitoring & Observability: Actively building foundational skills
- Other: Performance Marketing, Business Development Consultancy

KEY PROJECTS

Scalable E-commerce Website — CI/CD Pipeline | [Personal Project](#) 2024 – 2025

- Engineered a Jenkins pipeline to automate build, test, and deployment stages end-to-end.
- Integrated GitHub version control with webhooks to trigger automatic builds on every code push.
- Improved development speed and deployment reliability by 80% through pipeline automation.

Two-Tier Flask App Deployment Using GitLab | [Personal Project](#) 2024 – 2025

- Built and containerized a Flask web application with a MySQL backend using Docker.
- Set up a robust GitLab CI/CD pipeline to eliminate manual deployment steps and accelerate delivery cycles.
- Reduced manual deployment effort by 80%, achieving full deployments in under 2 minutes.

Deploying a Three-Tier Application on Kubernetes | [Technical Publication](#)

- Authored a step-by-step technical guide on deploying a three-tier application architecture on Kubernetes, shared with the DevOps learning community.

PROFESSIONAL EXPERIENCE

Business Development Manager | [Agix International Pvt. Ltd.](#) Jul 2026 – Present

- Drive revenue generation and client acquisition for a technology company spanning enterprise software, AI/analytics, and cloud services.
- Prepare formal technical proposals and presentations for prospects and internal stakeholders, translating technical capabilities into client-facing value.

DevOps Trainee | [TrainWithShubham](#) Jan 2025 – Nov 2025

- Completed structured, hands-on training in DevOps practices including Linux, Git/GitHub, Docker, Kubernetes, Jenkins, and CI/CD pipelines.
- Contributed to the 90 Days of DevOps community challenge, building and documenting real-world automation projects.

CERTIFICATIONS & HONORS

- DevOps Engineer Expert Certification
- ELTIS – Spoken Language Certification
- Pursuing: AWS Certified Solutions Architect – Associate (SAA-C03)
- DevOps Project Excellence Award | Continuous Learning Achievement | Community Contributor – DevOps Learners Group | Technical Writing & Knowledge Sharing

EDUCATION

Bachelor of Computer Applications (BCA) | [Balbhim College of Art, Science And Commerce, Beed](#) Jun 2022 – Apr 2025
